Course Book

Technical English is an undergraduate course over two 12-weeks semesters throughout one academic year. It focuses on the acquisition of English Language skills needed in the local across several disciplines as (medical, engineering, media, Course accounting and management) with focusing on the labour market. **Description** The curriculum is arranged into different units. Each unit is divided into four sections, and each section focuses on the four skills, speaking, listening, reading and writing. The object of this course is: English language skills in terms of what the students need when they are studying English as a second or foreign language. The course gives students the practical training they need to bridge the gap between the classroom and the world of work. It helps learners to make Course measurable progress in learning English while helping to make them more employable. This course is designed for students with no work experience. It also objectives provides many suggestions and alternative ways to use the material for those students already in work. The content also takes into consideration the CEFR (English Language Levels) of the content. It is to commence at A2 (intermediate level) and gradually rise to B1 (upper intermediate level). Students have to fulfilled their fundamental role in both the class or electronic platforms, according to the university rules as: Attendance: Students should make every effort to maintain good attendance in Student's their classes or checking their platforms account. obligation Participation: Each student should participate in their classes (face to face class/ electronic one). Discussing relevant subjects at appropriate times can spark new conversations and produce valuable debates, also each student should contribute to the assignment. Students who are shy do not have to take a leadership role, but they can offer to take notes and add a few ideas.

Questions: Asking questions about unclear material is an important part of the classroom experience. It is not uncommon for students to have similar difficulties, so speaking up will help everyone understand the discussed information. As a teacher, I can also benefit from a student's questions. By finding out what subjects are hard to understand, based on that I can adjust my lectures to clear up confusing topics.

Respect: is another point that the students should into consideration. Students need to respect the ideas and opinions of their classmates in and outside of the classroom. They should not ridicule someone for having a different viewpoint, and they should be willing to listen to alternative perspectives.

Preparation: Students should present four presentations within this academic semester. In addition to, they have to do their weekly assignments before their attendance to the class.

Required Learning Materials

The methods of teaching and learning used in this course are crucial to its success. A passive lecture-type method of teaching will not work here. The method has to be Task-based, with student activities and participation a frequent element throughout the course such as group work and discussion, presentations etc. Audio-visual learning tools are important here, as a central computer system, smartboard or projector with interactive programs are all complementary to the learning process.

Relevant Learning

Weight (Marks) Due Week

	Task		Weight (Marks)	Due Week	Outcome
	Paper Review		-	-	-
Evaluation	Assignments	Homework	10%	2 nd , 7 th	The paper will be marked.
	ents	Class Activity	2%	-	-
		Report	-	-	-
		Seminar	8%	3 rd	6 & 7
		Essay	8%	6 th	1, 3 & 7
		Project	-	-	-
	Quiz		8%	All	All
	Midterm Exam		24%	-	-
		Final Exam	40%	-	-
