Course Book

<p>Course Description</p>	<p>English Language (may be called Technical English in future) is an undergraduate course over two 15-weeks semesters throughout one academic year. It focuses on the acquisition of English Language skills needed in the local across several disciplines as (medical, engineering, media, accounting and management) with focussing on the labour market.</p> <p>The curriculum is arranged into different units. Each unit is divided into four sections, and each section focuses on the four skills, speaking, listening, reading and writing.</p>
<p>Course objectives</p>	<p>The object of this course is: English language skills in terms of what the students need when they are studying English as a second or foreign language.</p> <p>The course gives students the practical training they need to bridge the gap between the classroom and the world of work. It helps learners to make measurable progress in learning English while helping to make them more employable. This course is designed for students with no work experience. It also provides many suggestions and alternative ways to use the material for those students already in work. The content also takes into consideration the CEFR (English Language Levels) of the content. It is to commence at A2 (basic “beginner” level) and gradually rise to B1 (intermediate level).</p>
<p>Student's obligation</p>	<ol style="list-style-type: none"> 1. Students have to fulfilled their fundamental role in both the class and electronic platforms, according to the university rules as: 2. Attendance: Students should make every effort to maintain good attendance in their classes or checking their platforms account. 3. Participation: Each student should participate in their classes (face to face class and electronic one). Discussing relevant subjects at appropriate times can spark new conversations and produce valuable debates, also each student should contribute to the assignment. Students who are shy do not have to take a leadership role, but they can offer to take notes and add a few ideas. 4. Questions: Asking questions about unclear material is an important part of the classroom experience. It is not uncommon for students to have similar difficulties, so speaking up will help everyone understand the discussed information. As a teacher, I can also benefit from a student’s questions. By finding out what subjects are hard to understand, based on that I can adjust my lectures to clear up confusing topics. 5. Respect: is another point that the students should into consideration. Students need to respect the ideas and opinions of their classmates in and outside of the classroom. They should not ridicule someone for having a different viewpoint, and they should be willing to listen to alternative perspectives. 6. Preparation: I expect the students to study outside of the classroom. Students should complete assigned reading before class begins, so they can contribute their thoughts to new discussions. They should also finish homework before entering the classroom.

Required Learning Materials	1. Course materials 2. Classroom with interactive whiteboard + internet connectivity Personal tools and protection equipment				
Evaluation	Task		Weight (Marks)	Due Week	Relevant Learning Outcome
	Paper Review		-	-	-
	Assignments	Homework	10%	2 nd , 10 th	6, 7, 9
		Class Activity	2%	-	All
		Report	-	-	3, 4 & 5
		Seminar	8%	6 th	6 & 7
		Essay	8%	4 th	-
		Project	-	-	-
	Quiz		8%	4 th , 6 th , 8 th	1, 3
	Midterm Exam		24%		1, 3
	Final Exam		40%		1, 3
Total		100%
