## **Course Book**

	English Language (may be called Technical English in future) is an undergraduate					
	course over two 15-weeks semesters throughout one academic year. It focuses on					
	the acquisition of English Language skills needed in the local across several					
Course	disciplines as (medical, engineering, media, accounting and management) with					
Description	The curriculum is arranged into different units. Each unit is divided into four					
	sections, and each section focuses on the four skills, speaking, listening, reading					
	and writing.					
	The object of this course is: English language skills in terms of what the students					
	need when they are studying English as a second or foreign language.					
	The course gives students the practical training they need to bridge the gap					
<b>C</b>	between the classroom and the world of work. It helps learners to make					
Course	measurable progress in learning English while helping to make them more					
objectives	employable. This course is designed for students with no work experience. It also					
	provides many suggestions and alternative ways to use the material for those					
	students already in work. The content also takes into consideration the CEFR					
	(English Language Levels) of the content. It is to commence at A2 (basic "beginner" level) and gradually rise to B1 (intermediate level).					
	1. Students have to fulfilled their fundamental role in both the class and electronic					
	platforms, according to the university rules as:					
	2. Attendance: Students should make every effort to maintain good attendance in					
	their classes or checking their platforms account.					
	3. Participation: Each student should participate in their classes (face to face class					
	and electronic one). Discussing relevant subjects at appropriate times can spark					
	new conversations and produce valuable debates, also each student should					
	contribute to the assignment. Students who are shy do not have to take a leadership role, but they can offer to take notes and add a few ideas.					
	4. Questions: Asking questions about unclear material is an important part of the					
Student's	classroom experience. It is not uncommon for students to have similar					
obligation	difficulties, so speaking up will help everyone understand the discussed					
	information. As a teacher, I can also benefit from a student's questions. By					
	finding out what subjects are hard to understand, based on that I can adjust my					
	lectures to clear up confusing topics.					
	5. Respect: is another point that the students should into consideration. Students					
	need to respect the ideas and opinions of their classmates in and outside of the					
	classroom. They should not ridicule someone for having a different viewpoint,					
	and they should be willing to listen to alternative perspectives.					
	6. Preparation: I expect the students to study outside of the classroom. Students should complete assigned reading before class begins, so they can contribute					
	their thoughts to new discussions. They should also finish homework before					
	entering the classroom.					

Required Learning Materials	<ol> <li>Course materials</li> <li>Classroom with interactive whiteboard + internet connectivity</li> <li>Personal tools and protection equipment</li> </ol>					
	Task		Weight (Marks)	Due Week	Relevant Learning Outcome	
	Paper Review		-	-	-	
		Homework	10%	2, 10	6, 7, 9	
	Assignments	Class Activity	2%	-	All	
	sign	Report	-	-	3, 4 & 5	
Evaluation	ıme	Seminar	8%	6	6&7	
	nts	Essay	8%	4	-	
		Project	-	-	-	
	Quiz	Quiz		4, 6, 8	1, 3	
	Midterm Exam		24%		1, 3	
	Final Exam		40%		1, 3	
	Total		100%
