<p>Course Description</p>	<p>Presents examples of important programming languages and paradigms such as C#. Students write sample programs from c#. The languages are used to illustrate programming language constructs such as binding, binding times, data types and implementation, operations (assignment datatype creation, pattern matching), data control, storage management, parameter passing, and operating environment. The suitability of these various languages for particular programming tasks is also covered.</p>				
<p>Course objectives</p>	<p>To learn c#, Language programming concepts and techniques. To develop the ability to logically plan and develop windows application, web application and mobile application .</p>				
<p>Student's obligation</p>	<p>In this section the lecturer shall write the role of students and their obligations throughout the academic year, for example the attendance and completion of all tests, exams, assignments, reports , essays...etc</p>				
<p>Required Learning Materials</p>	<p>Computer, PowerPoint, Data show and white board</p>				
<p>Evaluation</p>	<p>Task</p>		<p>Weight (Marks)</p>	<p>Due Week</p>	<p>Relevant Learning Outcome</p>
	<p>Paper Review</p>				
	<p>Assignments</p>	<p>Homework</p>	<p>8</p>		
		<p>Class Activity</p>	<p>2</p>		
		<p>Report</p>	<p>8</p>		
		<p>Seminar</p>	<p>8</p>		
		<p>Essay</p>			
		<p>Project</p>	<p>10</p>		
	<p>Quiz</p>		<p>8</p>		
<p>Lab.</p>					

	Midterm Exam	16		
	Final Exam	40		
	Total	100		
Specific learning outcome:	<p>The following are the official course goals agreed upon by the faculty for this course:</p> <p>Knowledge of, and ability to use, language features used in current programming languages.</p> <p>An ability to program in different language paradigms and evaluate their relative benefits.</p> <p>An understanding of the key concepts in the implementation of common features of programming languages.</p>

Course topics (Theory and Practical)		Week	Learning Outcome	
Course overview and Introduction		1		
Review programming		2		
Machine language and HIGH LEVEL Language		3		
Variables. Date types. Operators. Functions		4 ,5		
Conditional statements ,		6		
Keyword , type casting , user input		7,8		
Operation		9 ,10		
If , for ,		11,12		
switch , while loop, while		13– 14
