Course Book

Course Description	<p>This course serves as a foundation for nursing. It is designed to provide students with the knowledge of basic nursing principles, and skills needed for practicing foundations of nursing which are needed for Physiotherapist. This course also provides laboratory guided experience which helps the students to develop psycho-motor skills needed to provide safe basic nursing care. The course focuses on development of skills related to hospitalization, vital signs and functions, asepsis and infection control, maintaining safe environment, personal hygiene, and wound care.</p>				
Course objectives	<p>On completion of this course the student will be able to:</p> <ul style="list-style-type: none"> •Understand development and basic principles of nursing. •Understand concepts of health, wellness and illness. •Describe types of health care delivery systems. •Recognize the basic nursing concepts underlying the nursing interventions in adult nursing care. •Demonstrate knowledge and skills of vital signs assessment and measurement •Recognize the principles of infection control and manifest skills related to medical and surgical asepsis. •Utilize the principles of good hygiene in providing body, hair, mouth and foot care. •Recognize the main principles of wound care and perform related skills. •Demonstrate knowledge and skills of preparation and administration of medications. 				
Student's obligation	<p>Attendance and completion of theoretical and practical lectures. Obtain theoretical and practical skills regarding fundamentals of nursing. Attendance and completion of completion of all tests, exams, assignments. Students are requested to wear white coats during the practical laboratory lectures. They must avoid mobile phones during both theoretical and practical hours.</p>				
Required Learning Materials	<p>Data show, white board, paper sheet, online lesson</p>				
Evaluation	Task	Weight (Marks)	Due Week	Relevant Learning Outcome	
	Paper Review				
	Assignments	Homework	5%		
		Class Activity	2%		
		Report	5%		
		Seminar	5%		
		Lab Report	10%		
	Project				
Quiz		8%			

	Theory Midterm Exam	10%		
	Lab Midterm Exam	15%		
	Final Exam	40%		
	Total	100%		
Specific learning outcome:	By the end of the course, the student will be able to: 1. Perform basic nursing skills in the simulated clinical laboratory

Course topics (Theory)	Week	Learning Outcome
Health and wellness	1	
Introduction to Nursing, definitions, nurse duty, physiotherapist duty	2	
Admission of patient to hospital, patient's unit, relationships with other health professionals, qualification of a nurse.	3, 4	
Blood pressure	5	
Physical examination, body positions	6	
Administration of medications	7	
Intramuscular, intradermal, and subcutaneous injection	8	
Intravenous injection	9	
Sterilization and disinfection	10	
Dressing and bandaging	11	
Rehabilitation of patient with limited mobility	12	

Practical Topics	Week	Learning Outcome
Hospital, hospital departments, patient chart and charting	1	
Hand washing, Applying sterile glove, gowning	2	
Measuring body temperature, pulse, respiration	3	
Measuring blood pressure	4	
Patient positions	5	
Oxygen inhalation	6	
Intramuscular injection	7	
Intradermal injection	8	
subcutaneous injection	9	
Intravenous injection	10	
Administration of drug	11	
Dressing	12	

Questions Example Design

Type of question:

- Multiple choice
- Short answer
- Matching pairs
- Definition
- Fill the blanks
- Enumerate the followings.
