Course Book

- **Course overview:**

In this course the students will learn how to treat the patients morally. Students will have the basic information about how to engage in their work place and with the staff of the clinical services. At the end of the course the student will get the idea of professionalism in the work and all the principles of ethics and the etiquette of the professional work.

- **Course objective:**

The philosophy of moral values can develop fundamental skills in students' career in a professional way. The students after graduation and working in the private clinics or in hospitals, they develop their understanding of the ethics elements, which are necessary for the communication and attachment with the patients. The students participate in an active, small-group learning experience, recalling concepts and information. Addressing questions related to the way of decision and diagnosis of abnormalities in their work.

- **Student's obligation**

- 1- All student should be prepared in all times of hours in the classroom
- 2- All days, we had a quiz about the before subject in the classroom.
- 5- having a seminar.

Student must have attended to all required core course during academic year. They should take all quizzes and complete both main exams, assignment of weekly homework. Practically, a weekly experiment must be conducted, result and question must be discussed in groups, and submit a weekly report about their trail.

- **Forms of teaching**

Different methods and tools to be used in this course.

Theory: lecture, group discussion, seminar, pair work, group work, role play.

- **Assessment scheme**

10% Mid-term Theory exam

10% Quizzes

40% Activity (Participation, Seminars, Reports and homework)

40% Final theory

- **Specific learning outcome:**

At the end of this course all the students will be able to learn how to behave in their work place.

- They will learn how to deal with patients and the environment around them.

Theoretical Exams

Theoretical exams use:

- written tests that include Definition, multiple choice, Filling blanks, true and false questions and Enumerating
- quizzes –short, unannounced tests
- assignments

The duration and number of questions of the tests depend on the type of the test (quiz, mid-semester, final) and complexity of the topic under evaluation. Exam papers are marked by lecturers/assistant lecturers and clinical instructors who deliver the teaching and is done by using previously agreed evaluation key.

Examples of exams:

Type of question	Example
Multiple choice	The training course for physiotherapy students is centred around ----- types of service-learning opportunities. a. two b. three c. four d. five
Definition	Define the followings: Confidentiality, Physiotherapy skills, Critical challenges.
True and false	Put letter F (false) or letter T (true) in front of the statement: () Health behaviours in youth do not continue into adult life. () Confidentiality derives indirectly from a healthy respect for people.
Short essay	1. What is the health promotion? 2. Count the roles of physiotherapy department students during a course training? 3. What are the Safety and Etiquette Tips for doing home visits?
Quiz	What are the differences between Health promotion and professional ethics?
Filling blanks	1. Physiotherapy education is a part of -----. 2. Physiotherapists need to understand ----- to

	<p>collaboratively facilitate behaviour change. 3. Benefits of experiential activities to learn about professional/personal -----. Answers: (1. health care services 2. Roles 3. determinants of health)</p>	
<p>- Extra notes: Advice on answering technique In order to pass the exams successfully students are given the following advice:</p> <ul style="list-style-type: none">• To read the questions twice• Think carefully before answering• Plan the answers on a separate sheet of paper		
<p>- External Evaluator The content of the course book has the proper information of the basic scientific subjects regarding the health promotion course. The type and the quality of the questions suits second grade students in Physiotherapy departments. Because after graduation the students will need these knowledges to understand and guide the problems coming from the people and the patients in health care centres and hospitals. In my opinion, the syllabus contains all the main aspects of Health promotion course.</p> <p>Dr. Mahdi Lecturer Hawar Jawdat Jaafar Assist. Lecturer</p>
