

Module (Course Syllabus) Catalogue 2023-2024

College/ Institute	Khabat Technical Institute	
Department	Plant Protection	
Module Name	Statistics and experiments Design	
Module Code	SED305	
Degree	Technical Diploma <input checked="" type="checkbox"/>	Bachler <input type="checkbox"/>
	High Diploma <input type="checkbox"/>	Master <input type="checkbox"/> PhD <input type="checkbox"/>
Semester	Three	
Qualification	MSc	
Scientific Title	Assistant Professor	
ECTS (Credits)	6	
Module type	Prerequisite <input type="checkbox"/>	Core <input checked="" type="checkbox"/> Assist. <input type="checkbox"/>
Weekly hours	4 hr	
Weekly hours (Theory)	(1) hr Class	() Total hrs Workload
Weekly hours (Practical)	(3) hr Class	() Total hrs Workload
Number of Weeks	12	
Lecturer (Theory)	Hemn Othman Salih	
E-Mail & Mobile NO.	hemn.salih@epu.edu.iq (07504703032)	
Lecturer (Practical)	M. Hemn Othman Salih Dr. Ismail Anwer Said M. Shwan Muhamad Baper	
E-Mail & Mobile NO.	hemn.salih@epu.edu.iq (07504703032) ismail.said@epu.edu.iq (07504026294) shwan.baper@epu.edu.iq (07513238524)	

Course Book

<p>Course Description</p>	<p>This course offers lecture and online interaction to provide a foundation in statistics concepts. The statistics is the Science of collection, presentation, analysis, and reasonable interpretation of data.</p> <p>Statistics presents a rigorous scientific method for gaining insight into data. For example, suppose we measure the weight of 100 patients in a study. With so many measurements, simply looking at the data fails to provide an informative account. However statistics can give an instant overall picture of data based on graphical presentation or numerical summarization irrespective to the number of data points. Besides data summarization, another important task of statistics is to make inference and predict relations of variables.</p>
<p>Course objectives</p>	<p>The educational Objectives of this Course are:</p> <ol style="list-style-type: none"> 1. You will be prepared for more advanced courses in multiple regression and analysis of variance. 2. You will be prepared for more advanced courses in multiple regression and analysis of variance 3. .You will learn and appreciate the sensation of quantification. 4. You will be prepared for more advanced courses in multiple regression and analysis of variance. 5. You will learn and appreciate the sensation of quantification 6. . We will help each other so that no one will fail. 7. You will be prepared for more advanced courses in multiple regression and analysis of variance. 8. You will learn and appreciate the sensation of quantification. 9. We will help each other so that no one will fail.You will fall in love with statistics! 10. Make skills in probability equation's solving 11. Beside the theoretical part, there will be practical part that includes the training on the SPSS program.

	This subject will give the students the ability to make a match with other subject in future like the Cryptography and Security tasks.
Student's obligation	Students are asked to do mandatory the following duties during the 12 weeks of the semester: 1- Quiz. 2- Homework. 3- Seminars. 4- Semester report. 5- Lab. activity.
Required Learning Materials	The use of the following methods in the teaching process: 1. Data Show 2. Presentation 3. Course book 4. Lecturer Bound 5. Patient Magic
Evaluation	Homework, Class Activity, Report, Seminar, Quiz, Lab., Midterm Exam, Final Exam
Specific learning outcome:	On successful completion of the course, the student will: 1. Distinguish types of studies and their limitations and strengths, 2. Describe a data set including both categorical and quantitative variables to support or refute a statement, 3. Apply laws of probability to concrete problems, 4. Perform statistical inference in several circumstances and interpret the results in an applied context, 5. Use mathematical tools, including calculus and linear algebra, to study probability and mathematical statistics and in the description and development of statistical procedures, 6. Use a statistical software package for computations with data, 7. Use a computer for the purpose of simulation in probability and statistical inference, and Communicate concepts in probability and statistics using both technical and non-technical language.

Course topics (Theory) Course topics (Practical): Implementation by computer	Week	Learning Outcome
Statistics: introduction, definitions.	1	Descriptive & Inferential Statistics A Taxonomy of Statistics
Statistical Measurements: Central Measures.	2	Mean Mode Median
Statistical Measurements: Measures of Dispersion	3	Range Mean Deviation Standard deviation Variance Coefficient of variation Standard Error
Graphical data presentation	4	Bar chart Scatter plots Line graph Pie chart Histogram

Family No.	1	2	3	4	5	6	7	8	9	10
Incomes	1000	500	600	900	500	700	700	800	600	650

Q/Analysed the level of Protein from 6 samples of Wheat by using spectrophotometer and titration, does there is differences between this two methods or not?

If the t-table is (2.57) \bar{X}_1 (10, 9, 10, 8, 6, 15), \bar{X}_2 (6, 10, 5, 4, 5, 7).

Q / From the following data, find (15, 10, 20, 10, 25, 5)

1- S^2

2- C.V

3- SE

4- Me

5- S
