- **Forms of teaching**

The Lecture will be delivered through variety of methods as the following:

1. All the lecture will available on the Moodle.
2. PowerPoint Presentation
3. White Board
4. Some Books
5. Group activity and peer working

- Assessment scheme

Breakdown of overall assessment and examination of this course

Assessment	Percent of Final Grade
Attendance and daily Participation (Quiz)	5%
Midterm Exam (Theory + Clinical + Lab)	20%
Report or Presentation (Assignment)	5%
2 nd Midterm Exam (Theory + Clinical + Lab)	20%
Final Exam	60%
Total	100%

Evaluation: Final Grade Level:

Grading Scale (%)

90-100	Excellent
80 - 89	Very Good
70 - 79	Good
60 - 69	Medium
50 – 59	Satisfactory
Below 50	Fail

- Specific learning outcome:

by the End of this course the student will be able to:

Provide care for clients with respiratory, cardiovascular, endocrine, gastrointestinal, musculoskeletal system alterations.

.. Utilize knowledge from the humanities and science in planning the care of

▪ Magazines and review (internet):

- Course topics (Theory)	Week	Learning Outcome
Part I: Introduction to Medical Surgical Nursing.	One	By the end of this lecture student will be able to: Understand the concept of medical and surgical nursing
Part II: Nursing process; definition, objectives and steps.	Two	Students will be able to: 1. Understand to the nursing process. 2. Analysis every single steps of nursing process such as nursing diagnosis, planning, outcome, intervention and evaluation. 3. Applying every steps of nursing process.

		4. Evaluate the care that given to the specific situation
Part III: Nursing management for patients with cardiovascular disorders: - Hypertension	Three	Students will be able to: 1. Understand of hypertension. 2. Realize with the different types of hypertension 3. Learn how to manage different types of hypertension. 4. Know nursing intervention for hypertension.
Part III: Nursing management for patients with cardiovascular disorders: - Ischemic heart disease - Myocardial Infraction - Congestive heart failure	Four	Student will be able to: 1. Understand of ischemic heart disease and MI. 2. Realize with the different types of ischemic heart disease 3. Learn how to manage different types of ischemic disease. 4. Know nursing intervention for ischemic heart disease.
Part IV: Nursing management for patients with digestive system diseases - GERD	Five	Student will be able to: 1. Understand of Gastric disorder (GERD). 2. Realize with the different types of Gastric disorder (GERD). 3. Learn how to manage different types of Gastric disorder (GERD). 4. Know nursing intervention for Gastric disorder (GERD).
Part IV: Nursing Care of patient with cancer - Definition - Types - Sign and symptoms - Treatment and nursing management for cancer	Six	Student will be able to: 1. Understand of cancer diseases. 2. Realize with the different types of cancer diseases. 3. Learn how to manage different types of cancer diseases. 4. Know nursing intervention for cancer diseases.
Part V: Nursing care for patient with endocrine system disorders. - Nursing management for patients with diabetes mellitus	Seven	Student will be able to: 1. Understand of endocrine system disorder (diabetes mellites). 2. Realize with the different types of endocrine system disorder (diabetes mellites).

		<p>3. Learn how to manage different types of endocrine system disorder (diabetes mellites).</p> <p>4. Know nursing intervention for endocrine system disorder (diabetes mellites).</p>
<p>Part V: Nursing care for patient with endocrine system disorders.</p> <ul style="list-style-type: none"> - Hypothyroidism - Hyperthyroidism - 	Eight	<p>Student will be able to:</p> <ol style="list-style-type: none"> 1. Understand of endocrine system disorder (hypothyroidism). 2. Realize with the different types of endocrine system disorder (hypothyroidism). 3. Learn how to manage different types of endocrine system disorder (hypothyroidism). 4. Know nursing intervention for endocrine system disorder (hypothyroidism).
<p>Part V: Nursing care for patient with nervous system disorder</p> <ul style="list-style-type: none"> - CVA - Meningitis - Epilepsy 	Nine	<p>Student will be able to:</p> <ol style="list-style-type: none"> 1. Understand of nervous system disorder (CVA, meningitis, epilepsy). 2. Realize with the different types of nervous system disorder (CVA, meningitis, epilepsy). 3. Learn how to manage different types of nervous system disorder (CVA, meningitis, epilepsy). 4. Know nursing intervention for nervous system disorder (CVA, meningitis, epilepsy).
<p>Part VI: Nursing management for patients with blood disorder.</p> <ul style="list-style-type: none"> - Anemia and its types - Leukemia 	Ten	<p>Student will be able to:</p> <ol style="list-style-type: none"> 1. Understand of blood disorder (Anaemia and Leukaemia). 2. Realize with the different types of blood disorder (Anaemia and Leukaemia). 3. Learn how to manage different types of blood disorder (Anaemia and Leukaemia). 4. Know nursing intervention for blood disorder (Anaemia and Leukaemia).
<p>Part VI: Nursing care for patients with respiratory disorders</p> <ul style="list-style-type: none"> - Pneumonia - COPD 	Eleven	<p>Student will be able to:</p> <ol style="list-style-type: none"> 1. Understand of respiratory disorder (Pneumonia and COPD and asthma).

Erbil Polytechnique University

<ul style="list-style-type: none"> - Asthma 		<p>2. Realize with the different types of respiratory disorder (Pneumonia and COPD and asthma).</p> <p>3. Learn how to manage different types of respiratory disorder (Pneumonia and COPD and asthma).</p> <p>4. Know nursing intervention for respiratory disorder (Pneumonia and COPD and asthma).</p>
<p>Part VI: Nursing care for patients with integumentary diseases</p> <ul style="list-style-type: none"> - Assessment integumentary system - Dermatitis - Autoimmune disease 	Twelve	<p>Student will be able to:</p> <ol style="list-style-type: none"> 1. Understand of integumentary disease 2. Realize with the different types of integumentary disease 3. Learn how to manage different types of integumentary disease). 4. Know nursing intervention for integumentary disease
<ul style="list-style-type: none"> - Practical Topics (If there is any) 	Week	Learning Outcome
<p>Patient assessment</p> <ul style="list-style-type: none"> - History taking 	1	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn to start history taking 3. Analysing patients' health issue 4. Applying nursing intervention
<p>Patient assessment</p> <ul style="list-style-type: none"> - History taking - Physical examination 	2	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn to start history taking and physical examination 3. Analysing patients' health issue 4. Applying nursing intervention
<p>Patient assessment</p> <ul style="list-style-type: none"> - History taking - Physical examination - General examination 	3	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn to start history taking and physical examination and general examination 3. Analysing patients' health issue 4. Applying nursing intervention
<p>Patient assessment</p> <ul style="list-style-type: none"> - History taking - ESG taking 	4	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment

Erbil Polytechnique University

<ul style="list-style-type: none"> - ESG Interpretation 		<ol style="list-style-type: none"> 2. Learn how to taking history and taking ESG 3. Analysing patients' health issue 4. interpreting ESG 5. Applying nursing intervention
<p>Patient assessment</p> <ul style="list-style-type: none"> - History taking - Nursing care for Nasogastric tube - NG tube feeding 	5	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of NG tube preparation 3. Analysing patients' health issue 4. Applying nursing intervention for NG tube.
<p>Nursing assessment for</p> <ul style="list-style-type: none"> - History taking - Gastric lavage 	6	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of NG tube preparation 3. Analysing patients' health issue 4. Applying nursing intervention for NG tube. 5. Know how to perform gastric lavage.
<p>Nursing management for</p> <ul style="list-style-type: none"> - History taking - Urinary catheterization (male and female) 	7	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of urinary catheter preparation 3. Analysing patients' health issue 4. Applying nursing intervention for urinary catheter 5. Know how to perform catheter insertion.
<p>Nursing care for patient with</p> <ul style="list-style-type: none"> - history taking - Blood transfusion - Blood product transfusion 	8	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of blood transfusion preparation 3. Analysing patients' health issue 4. Applying nursing intervention for blood transfusion 5. Know how to perform blood transfusion.

Erbil Polytechnique University

<p>Nursing management for patient with respiratory problem</p> <ul style="list-style-type: none"> - History taking - Nebulizer - Oxygen therapy 	<p>9</p>	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of NG tube preparation 3. Analysing patients' health issue 4. Applying nursing intervention for nebulizer and oxygen therapy. 5. Know how to perform nebulizer and given oxygen.
<p>Nursing care for</p> <ul style="list-style-type: none"> - History taking - Diabetic patient 	<p>10</p>	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Applying nursing intervention for diabetic patient.
<p>Nursing care for</p> <ul style="list-style-type: none"> - History taking - Eye irrigation - Ear irrigation 	<p>11</p>	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of eye and ear irrigation preparation equipment. 3. Analysing patients' health issue 4. Applying nursing intervention for eye and ear irrigation <p>Know how to perform eye and ear irrigation.</p>
<p>Nursing care for</p> <ul style="list-style-type: none"> - History taking - Patient with CVA 	<p>12</p>	<p>By the end of this clinical lecture student will be able to:</p> <ol style="list-style-type: none"> 1. Understand about patient assessment 2. Learn how to taking history and taking first principles of CVA patient management preparation 3. Analysing patients' health issue 4. Applying nursing intervention for patients with CVA.
<p>- Examinations (question design):</p> <ol style="list-style-type: none"> 1. Myocardial infarction is caused by reduced blood flow in a coronary artery due to _____ and occlusion of an artery by _____. 2. _____ Abdomen eventually becomes markedly distended; loops of colon become visibly outlined through the abdominal wall. 		

Q2: Putting the character in the Column B, in front of Column A: (15 Marks)

Column A

Volvulus: twisted bowel

Major cause of blindness

Acute cholecystitis

Q: A. Put true and False in front the below statements

1. Chronic cholecystitis usually associated with gallstone formation.
2. Cerebral vascular accident is one of potential complication essential hypertension.

Q: Answer the following question.

1. Enumerate, and briefly discuss nursing care plan, and intervention for patient with Anemia?
2. Explain Dietary management of the GERD?
3. How to instruct the patient with Asthma?

Q: Case Scenario:

50-year-old male patient presented to the emergency department at 2 AM with vomiting and abdominal pain. He had a 2-week history of polyuria and polydipsia, accompanied by a 10-killiogram of added to his weight, and blurred vision. His medical history was unremarkable, except for being treated for hypertension with amlodipine 10 mg daily, which provided good control. (His blood pressure on admission was 135/80.) Results of hospital laboratory studies revealed that the patient's initial blood glucose level was 1192 mg/dL. Diagnosed with Diabets Mellitus.

intervention for this patient?
