Course Book

Course Description	Managers at companies small and large must understand how revenues and costs behave or risk losing control of the performance of their firms. Managers use cost accounting information to make decisions about research and development, budgeting, production planning, pricing, and the products or services to offer customers. Sometimes these decisions involve tradeoffs.				
Course objectives	Your achievement level for each objective will be measured by your success in completing the homework, quizzes, and examinations. Upon completion of this course, the successful student will be expected to have developed the following competencies: 1. The bases of managerial accounting. 2/ preparing and understanding the managerial budgets. 3/ planning, controlling, decision making.
