CHAPTER FOUNDER

OUR EXCEPTIONAL SCHOOL ENVIRONMENT

ACI International, founded in 1904, is a technical and educational organization dedicated to improving the design, construction, repair and maintenance of concrete structures. The ACI Kurdistan Chapter was established in 2021 to gather the expert individuals, and businesses who share a common interest in concrete. The chapter is a platform for discussions on technical and educational information related to the production and use of concrete in Iraqi Kurdistan.

As part of our mission, we aim at enhancing the concrete work inspection by providing training and certify concrete technicians to improve the quality of concrete work.

Chapter Organizing Petition

Under the provisions of Article VI, Bylaws of the American Concrete Institute, as approved May 27, 1963, the undersigned ACI Members in good standing, petition the Board of Direction to authorize the formation of a chapter of ACI to be known as:

ACI KURDISTAN chapter

The geographic boundaries of this chapter are proposed as follows:
(Include counties, countries, or other geographical borders.)

Kurdistan Region

The objectives of the proposed chapter are:

To address the needs of rebuilding Kurdistan's skills and knowledge base in concrete research, design, manufacturing and construction sectors. The chapter activities will be designed to help meet Kurdistan engineers' technical and educational needs and introduce them to crucial new technologies through access to the vast resources of the ACI. Another major aim of the proposed ACI Chapter is to bring together the various individuals and groups in Kurdistan who are interested in developing their skills in concrete design and technology through discussions and dissemination of technical and educational information

This organizing petition was signed at Kurdistan (location)

About Aci-Kurdistan Chapter

The ACI chapter of Kurdistan is a recently established branch of ACI, which covers the geographic region of the southern Kurdistan which is so called (Iraqi Kurdistan region). The main goal of the chapter is to merge our knowledge about the concrete with the most recent standards and specifications. Also, the Kurdistan chapter makes a strong tie between the universities across the Kurdistan region.
