

Dear Dr. Abdullah,

Thank you for submitting your review for the article - **How do surface treatments affect osseointegration, antibacterial properties and flexural strength of zirconia-based implants? A scoping review.**

You will receive a copy of the editorial decision in due course.

As promised, the details of your submission discount for reviewing are shown below.

You have been awarded 10 PeerJ Tokens for your review(s) of this article. Each Token is worth 10 USD and can be exchanged for discounts on your next APC. Tokens can be stacked and pooled with your co-authors to maximize your discount. The more you review, the more tokens you can accumulate, the less you pay to publish.

For your reference, your review is appended below. Thank you again for the time you spent on it.

We hope you enjoyed reviewing with us. If you feel like sharing your experience please post us your feedback on X. Every post on X helps spread the word about PeerJ Materials Science, and supports our [publishing mission](#).
