June 11, 2025

Dear Madam or Sir,

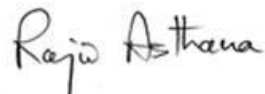

Please consider this letter as validating and commending Dr. Adil Othman Abdullah (adil.abdullah@epu.edu.iq) of Erbil Polytechnic University for his association with the *Journal of Materials Engineering and Performance* as a technical reviewer. Peer review constitutes a critical step in our publication processes. Dr. Abdullah reviewed the technical manuscript JMEP-25-05-42097 on June 11th, 2025, for the *Journal of Materials Engineering and Performance*, and he continues to be a reviewer for *JMEP*. His manuscript critiques are used to determine suitability for publication of articles in this international journal. The journal is published by Springer for ASM International, one of the world's leading materials information societies. *JMEP* publishes articles on all aspects of materials selection, design, processing, characterization, and evaluation that assist in solving current engineering challenges.

The journal receives a very large number of manuscripts authored by professionals from all over the world each year. Manuscripts are reviewed for technical excellence, quality, and relevance by competent reviewers. The editors identify and select reviewers based on their demonstrable and recognized research expertise, professional experience, critical judgment and foresight, and forward thinking in their field of expertise.

We ask our reviewers to provide a detailed critique of submitted manuscripts which usually leads to significant improvements in manuscript quality. Dr. Abdullah was selected as a reviewer because of his recognized expertise in ceramics, structural, coatings and paints, composites, ceramics matrix, and nanomaterials.

We depend upon reviewers such as Dr. Abdullah to aid publication of a quality journal and we look forward to his continued services as a reviewer for *JMEP*.

Sincerely,

Rajiv Asthana, Ph.D.
Editor-in-Chief
